A deep dive into the timeless Indian traditions of inquiry and knowledge creation!

## Why This Seminar?

Modern research frameworks often marginalize Indic epistemologies, which have guided millennia of inquiry—from Nyaya to Darshanas, Itihasa, and Lokavidya. This seminar series seeks to:

- Revisit the research fundamentals of Bharatiya knowledge traditions
- Understand research as a Sāadhanā (discipline), not merely methodology
- Explore tools and frameworks rooted in Bharatiya ontology and logic
- Enable scholars to think from within the tradition
